Sudip Niroula

Birtamod, Jhapa, Nepal · sudipniroula5@gmail.com
sudipniroula.com.np · github.com/imsudip45 · linkedin.com/in/sudipniroula45

TECHNICAL SKILLS

- **Languages:** Python, TypeScript, JavaScript, SQL
- **Backend:** FastAPI, Django REST Framework, Node.js
- **Frontend:** Next.js, React
- **Desktop:** PySide6, Electron.js
- **Data and infrastructure:** PostgreSQL, Docker, AWS, GCP, CI/CD, Git
- **AI:** LangChain, Gemini API

EXPERIENCE

Full Stack Engineer, Nullion Technologies LLC (Pittsburgh, Pennsylvania, USA) · Remote — May 2026–present

Backend and frontend development on three products, using FastAPI, Next.js and PostgreSQL:

- **Align Care Hub** and **Align Care DODD**: SaaS products for home care agencies in the US. Align Care Hub handles hiring, compliance, scheduling and visits. Align Care DODD handles day programs, transport and Medicaid billing.
- **Bookkeeping Platform**: a web app for small businesses. They record each transaction once, and the app produces their income statement, balance sheet and cash flow.

Software Engineer, FutureFrame Pvt. Ltd. · Lalitpur, Nepal — Feb 2025–Mar 2026

- Built **Football Score Pro**, a desktop app for managing football match scores, in Python with PySide6
- Built **Football Score Lite**, the lighter version of the score system, in Electron.js
- Built web graphics for live broadcasts

Technical Lead, Seabirds Pictures (Lisbon, Portugal) · Contract, remote — Jul 2025–Aug 2025

- Built web applications with Django REST Framework and Next.js

PROJECTS

Labhya Compute: GPU rental marketplace · College project, team of three — GitHub

- A marketplace where people can rent out their idle GPUs by the hour
- Hosts run a desktop app that starts a Docker container and opens a reverse SSH tunnel to a relay server. Renters connect through the relay using SSH
- Built with Next.js, PostgreSQL, Docker and Tkinter; I later rewrote the Django REST Framework backend in FastAPI

Fingerprint: AI learning companion for kids · Personal project, entered in the Google Gemini API Developer Competition

- A tutor that children can simply talk to, using Gemini Live for real-time voice conversation
- A backend planner decides when to show a picture, give a quiz, work through an example, look something up, or read a worksheet the child shares
- Built with FastAPI, React and the Gemini Live API

Persona: multi-agent AI shopping companion · Team project for the AI Builder Cup — GitHub

- An e-commerce platform with an AI companion called Pip. Instead of sitting in a chat box in the corner, Pip moves around the page with the shopper
- Pip searches and compares products across categories and hands work to a small team of AI sub-agents
- Before confirming a cart change, Pip checks the database to make sure the change was actually saved
- Built with Next.js, FastAPI, PostgreSQL, Google Agent Development Kit and Gemini

EDUCATION

B.Sc. Computer Science and Information Technology (CSIT), Mechi Multiple Campus, Tribhuvan University — 2022–2026

- Aggregate: 71.57%, First Division

ADDITIONAL

- **Award:** Most Innovative Project, Ambition Hackathon 2025 (Labhya Compute)
- **English:** IELTS Academic 7.5 overall (Listening 8.0, Reading 8.5, Writing 6.5, Speaking 7.0)
- **Languages:** Nepali (native), English
